

Carefully read the description of the experiment below. Be prepared to answer the questions that follow the design description as a class quiz.

The JIPP curve, a plotted curve that shows the relationship between the wealth of nations and telephony density, was first described in the ITU Telecommunications Journal (July 1963). In a study of telecommunication demand an author wants to develop a JIPP curve between a country's gross domestic product (GDP) and internet development. What type of analysis would be most useful in describing this relationship?
